

CURRICULUM VITAE

of Mirtat S. BOUROUSHIAN

STUDIES – ACADEMIC CAREER

- 2006 – Assistant Professor in the School of Chemical Engineering, NTUA, majoring in “*Solid State chemistry*”
- 2001–2006 Lecturer in the School of Chemical Engineering, NTUA.
- 1998 Ph.D. in Chemical Engineering. National Technical University of Athens (NTUA)
- 1991 Diploma in Chemical Engineering, NTUA

Dissertations

“*Electrolytic preparation of Cd-Se-Te semiconductors*”. **PhD Thesis**. Laboratory of General Chemistry, Section of Chemical Sciences, School of Chemical Engineering, NTUA (1998), 297 p. (in greek).

“*Recycling of paper. Study of acidic treatment*”. **Diploma Thesis**. Laboratory of Organic Chemical Technology, Section of Synthesis and Development of Industrial Processes, School of Chemical Engineering, NTUA (1991), 129 p. (in greek).

Under-graduate courses

- 2002 – *Solid State Chemistry* – course in the School of Applied Mathematics and Physics (AMP), conducted at the 6th semester (7th from 2009).
- 1992 – Teaching assistance in students’ Laboratory Training for the Electrical and Computer Engineering (ECE), Mining and Metallurgical Engineering (MME), and Applied Mathematics and Physics Schools of NTUA. In detail:
- (1992-96) *Chemistry* (1st semester ECE), *General Chemistry II* (2nd semester MME)
 - (2000-01) *General Chemistry* (1st semester MME)
 - (2001 –) *General Chemistry* (5th semester AMP)

Post-graduate courses

- 2004 – “*Solid State Physics and Chemistry*”, 1st semester, and
- 1998-2000 (i) “*Solid State Chemistry*”, 1st semester, (ii) “*Semiconductors*”, 2nd semester (Interdepartmental Post-graduate Divisions of NTUA, Division of Material Science and Technology).
- 2001 – “*Topics in Chemical Technology*”, 1st semester (Studies in Didactics of Chemistry and New Educational Technologies; Inter-University post-graduate program of NTUA and National Capodistrian University of Athens).

Seminar lectures

- “*Electrodeposition of CdSe and Cd(Se,Te) thin films from near-boiling aqueous-ethyleneglycol solutions*”, Lecture for the Project “New Materials” in the frame of the 11th Seminar of the “Ecological Surface Finishing” (TEMPUS) NTUA, Athens (May 8-9, 1998).
- “*Electrodeposition of Semiconductors*” Micro and Nano Deposition (MINDE) Training Courses: ATC 3 “*Micro and Nano Scale Patterned Deposition*”, NTUA, Athens (Oct. 14-19, 2007).

Professional Memberships

Technical Chamber of Greece
Hellenic Association of Chemical Engineers
International Society of Electrochemistry

AUTHORSHIP

Monograph

M. Bouroushian: “*Electrochemistry of Metal Chalcogenides*”. Series: *Monographs in Electrochemistry* (Ed. F. Scholz), Springer-Verlag Berlin Heidelberg 2010, 358 p.

Textbooks

- M. Bouroushian: “*Solid State Chemistry*”, NTUA (Ed.) Athens (2005) 415 p. in Greek.
- M. Bouroushian, D. Vasilakopoulos & N. Spyrellis: “*General Chemistry*”. Textbook for the Public School, edited for the 1st Cycle of Technical Lyceum, Ministry of National Education of Greece (1999) 254 p. in Greek.

RESEARCH WORK

Electrochemistry of materials and crystal growth; namely, investigation of soft (electro)chemical methods intended to the controlled preparation and characterization of specific material microstructures, as well as the manufacture of heterostructures (metal-semiconductor, semiconductor-semiconductor, semiconductor-liquid junctions) featuring adjusted properties for technological applications. In particular:

- Synthesis of binary and ternary selenide and telluride compounds by electrochemical (constant and pulse current) deposition, chemical deposition, or hybrid techniques. The produced films in single and multiple layer configurations are evaluated as photovoltaic device components and also as electrodes in photoelectrochemical cell and photocatalytic applications.
- Electrochemical anodization of metals; production of porous oxides and investigation of optical sensitization effects in photoelectrochemical cells.
- Formation of simple and composite (polymer-reinforced) metallic coatings using constant and pulse current electrolytic techniques, and characterization of their microstructure in connection with mechanical properties and corrosion behavior. Theoretical and experimental study of the nucleation and crystal growth process.

Characterization and measuring techniques used in my research work include:

- Electrochemical methods, such as (photo)voltammetry, chronoamperometry, photocurrent spectroscopy, and electrochemical impedance spectroscopy (EIS).
- Solid state characterization: X-ray powder diffractometry (XRD), optical microscopy, Scanning Electron Microscopy (SEM), Energy Dispersive X-ray Analysis (EDAX), micro-Raman and X-ray Fluorescence (XRF) spectrometry.
- Optical methods: absorption/reflection spectroscopy of thin films, modulation spectroscopy, UV-Vis and Atomic Absorption Spectrometry (AAS).
- Evaluation of semiconductor diode characteristics, Hall effect and surface conductivity measurements.

My research work includes the following original publications in scientific journals and conference proceedings (and presentations):

Refereed Journal Articles

- 1.** M. Bouroushian, Z. Loizos, N. Spyrellis and G. Maurin: "Influence of heat treatment on structure and properties of electrodeposited CdSe or Cd(Se,Te) semiconducting coatings" *Thin Solid Films* 229 (1993) 101-106.

Reviewer for international scientific journals

Chemical Physics Letters, Thin Solid Films, Electrochimica Acta, Ionics (Springer) J. Materials Science, Materials Chemistry and Physics, J. Solid State Electrochemistry, Materials Research Bulletin, Applied Surface Science, Optical Materials, Solid State Sciences, Materials Science in Semiconductor Processing, Materials Science and Engineering B.

PROJECTS

Coordinated the following:

- “*ARIADNI: Electronic Course Pack: “Solid State Chemistry”*”, CSF III, EPEAEK II (03/2004 - 03/2005).
- “*Thermodynamics and charge transfer kinetics at semiconductor/electrolyte interfaces and heterostructures of microcrystalline semiconductors. A study of II-VI compounds’ single and double layer photoelectrodes*”, NTUA, Basic Research Program “Leucippus” (1/1/2006-31/12/2007).

Past Projects (selected)

“*Upgrading of the Undergraduate Curriculum of the three Chemical Engineering Depts. of Greece*” EPEAEK 1 program, Measure 3.1.a (1/1/1997-30/6/2000).

“*Improvement of the adhesive and corrosion resistance properties of unpainted and painted electrogalvanized steels*”, POLYMET” Brite EuRam III (BRPR - CT97 - 550) (1/3/1998 – 31/8/2001).

“*Development of laboratories network for the integrated control of environment quality*”, EPET II, Sub-project 3.1, National Secretariat of Research & Development (19/10/1999 – 19/10/2001).

“*Leucippus: Educational Chemistry software for the High School*”, EPEAEK, Measure 1.1.a, Pedagogical Institute, National Ministry of Development (2000-2001).

“*Production of Tutorial Multimedia for novel technologies and management systems. Environment – Energy - Safety*”, INTERREG, National Ministry of Economics, (1/4/2001 – 30/6/2001).

“*Plated copper interconnected systems for advanced microelectronics*”, INTAS Belarus-97-880, (1/1/1999 – 31/1/2001).

“*Development of software simulating the consequences of using chemical weapons*”, National Ministry of Defense (2001-2002).

“*Development of an integrated alternative system for the environmentally compatible management of spent batteries and accumulators*”, General Secretariat of Research & Technology, CSF III – OPC, Axis 4, Measure 4.5: Natural Environment and Sustainable Development (2003-2006).

Consultancy Activities

Study on the suitability of Polyethylene Pipes for drinking water supply Technical report (N. Spyrellis, A. Haloulakou, M. Bouroushian & I. Mavroidis; Athens, 1999, 100 p.) prepared for the National Company of Water Supply and Sewerage.
